

YAHUI XU

Software Engineer

Vancouver, BC, Canada | 672-551-3372 | xuyahui12@gmail.com
linkedin.com/in/yahui-xu | github.com/94yahui | Eligible to work in Canada

SUMMARY

Full-stack software engineer with hands-on experience building web and mobile applications using TypeScript, React, Next.js, and Swift. Familiar with cloud deployment on AWS EC2 and Netlify, Linux environments, and Apache server configuration. Passionate about AI and LLM integration, with foundational knowledge in agentic systems and RAG.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, Go, Swift

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Spring Boot, RESTful APIs

Databases: MongoDB, SQLite, PostgreSQL, Firebase

Cloud & DevOps: AWS EC2, Netlify, Docker, Kubernetes, Linux/Unix, Apache

AI / ML: LLM Integration, OpenAI API, RAG, Agentic Systems, Core ML, YOLO, Hugging Face

WORK EXPERIENCE

Web Developer

Jan 2026 – Present

Langara College – Fine Arts Department

Vancouver, Canada

- Developed and maintained the official 2026 Fine Arts Graduate Exhibition website (30+ graduating students with multi-angle imagery and video), deployed on Netlify with auto SSL, CDN delivery, and zero-downtime deploys.
- Worked with WordPress as the CMS, integrating custom functionality via functions.php hooks and Node.js to support dynamic content and extended features.
- Assisted with website deployment, operations, and maintenance, including server-side configuration, SSL setup, and troubleshooting across both the new Netlify deployment and the legacy AWS EC2 environment.
- Utilized AWS services (EC2) for hosting prior years' graduate exhibition sites, monitoring system health, and performing basic system management to ensure reliable performance.
- Collaborated with faculty and staff to update exhibition content, schedules, and student artwork information, iterating to a strict event-launch deadline.

Cloud Networking Engineer (Azure VPN)

Feb 2024 – Nov 2024

Wicresoft Software (Microsoft Outsourcing Partner)

Shanghai, China

- Supported enterprise customers in diagnosing and resolving Azure VPN connectivity, configuration, and performance issues, owning cases end-to-end.
- Utilized Microsoft internal diagnostic tools to analyze VPN logs, traffic flow, and security protocol behavior (IPsec/IKE).
- Collaborated with customers to troubleshoot hybrid cloud scenarios, ensuring secure and stable VPN tunnels across on-premises and Azure environments.

PROJECTS

Guardian – AI-Driven Assistive Navigation System (iOS)

Jan 2026 – Apr 2026

Tech: Swift, Core ML, YOLO, Spring Boot, PostgreSQL, JWT, Docker, AWS EC2

- Developed a comprehensive iOS accessibility application using Swift and Core ML to empower visually impaired users with real-time environmental awareness and hazard detection.
- Integrated YOLO computer vision models for spatial radar functionality and leveraged LLMs to provide interactive, voice-based scene descriptions.
- Built a robust backend using Spring Boot, PostgreSQL, and JWT authentication, containerized with Docker and deployed on Amazon EC2.
- Implemented accessibility-first UI patterns, including high-contrast layouts and "Guardian SOS" emergency alerts, ensuring a seamless experience for low-vision users.

Clario – Freelance Project, Finance & Contract-Risk Management App

Sep 2025 – Dec 2025

Tech: React, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Firebase, OpenAI API, Vite, Railway

- Co-developed Clario as part of a team, building a full-stack web application for managing projects, finances, and contracts for freelancers.
- Built frontend features with React, TypeScript, and Tailwind CSS, and implemented RESTful APIs using Node.js and Express.
- Integrated MongoDB, Firebase, and the ChatGPT API for contract-risk analysis, and deployed the application with Vite and Railway.

EDUCATION & CERTIFICATIONS

Post-Graduate Diploma, Web & Mobile App Development — Langara College, Vancouver Jan 2025 – Apr 2026

Bachelor of Science, Biotechnology — Qiqihar University, China Sep 2011 – Jun 2015

Fundamentals of Agents — Hugging Face (Apr 2026): LLM agent fundamentals, ReAct framework, tool integration.

AI Python for Beginners — DeepLearning.AI (Apr 2026): Python programming for AI, fundamentals and basic ML concepts.
